

RT/PROSIM/APP. LETTER/2014-15

Dated : 31.03.2015

Letter of Appreciation

This is to express our appreciation to M/S ProSIM for the excellent technical work carried out by them along with us to design, develop and manufacture an Enhanced Fatigue Meter (eFM) for use in Jaguar Aircraft for National Aerospace Laboratories (NAL).

The niche capability of ProSIM for design innovation has helped us in offering solutions for reduction in weight and for increasing the robustness of the unit to withstand the harsh environment experienced by combat aircraft in flight, especially during critical maneuvers and the unit was qualified as per Military Standards.

Excellent cooperation has been provided by ProSIM right from beginning by associating themselves with our Engineers for 3-D Modelling, thermal and stress analysis and design validation & optimisation, up to final testing and delivery. ProSIM also provided necessary coordination for getting approvals from CEMILAC, the regulatory authority for airborne equipment.

All the above services were provided by ProSIM with highest quality standards meeting required delivery schedule.

Thanking You,

Yours Faithfully,
For Rossell Techsys
(A Division of Rossell India Limited)
