LETTER OF APPRECIATION

We partnered with M/s ProSIM R&D Pvt Ltd., Bangalore for the seismic analysis & qualification of our various designs of cable tray support structures which was to be supplied to Nuclear Power Corporation of India (NPCIL) for their Kakrapar Atomic Power Projects (KAPP-3&4) & Rajasthan Atomic Power Projects(RAPP7&8) . A detailed report on the seismic evaluation as per ASME codes/Indian standards was an essential prerequisite before the structures could be installed at NPCIL sites.

ProSIM executed this job to the best satisfaction of all concerned at BGR Energy and our customer - NPCIL. ProSIM engineers demonstrated very high level of expertise in advanced Finite element analysis (FEA/FEM) and knowledge of ASME codes for seismic evaluation. ProSIM demonstrated good quality management practices and project management procedures during the course of this project. Also a good part of Prosim is in addition to presenting the analysis in a detailed manner, they also educated us to understand the analysis. The attitude of the Engineers in Prosim was extremely appreciable. It is worth to mention that, Prosim have provided opportunity to young Engineers involved in particular work to come forward and present the results and also Prosim allows them to discuss with client/End user.

During the course of this project, ProSIM did a very good job of interfacing with our teams and with our customer teams at NPCIL. ProSIM engineers redesigned and optimised some of the elements of the cable tray support unit to enable qualification & acceptance from our customer. ProSIM team was able to appreciate and understand the urgency of this project and delivered the same in a timely manner, which eventually helped us satisfy our customer needs.

Yours Faithfully,

For BGR Energy Systems Limited

R Ramesh
